

Dear Dynamark Dealer,

To access your accounts via our web portal and mobile app, please review the following information.

We have successfully obtained your existing Dynamark usernames; however, for security reasons, we are unable to retrieve your current passwords.

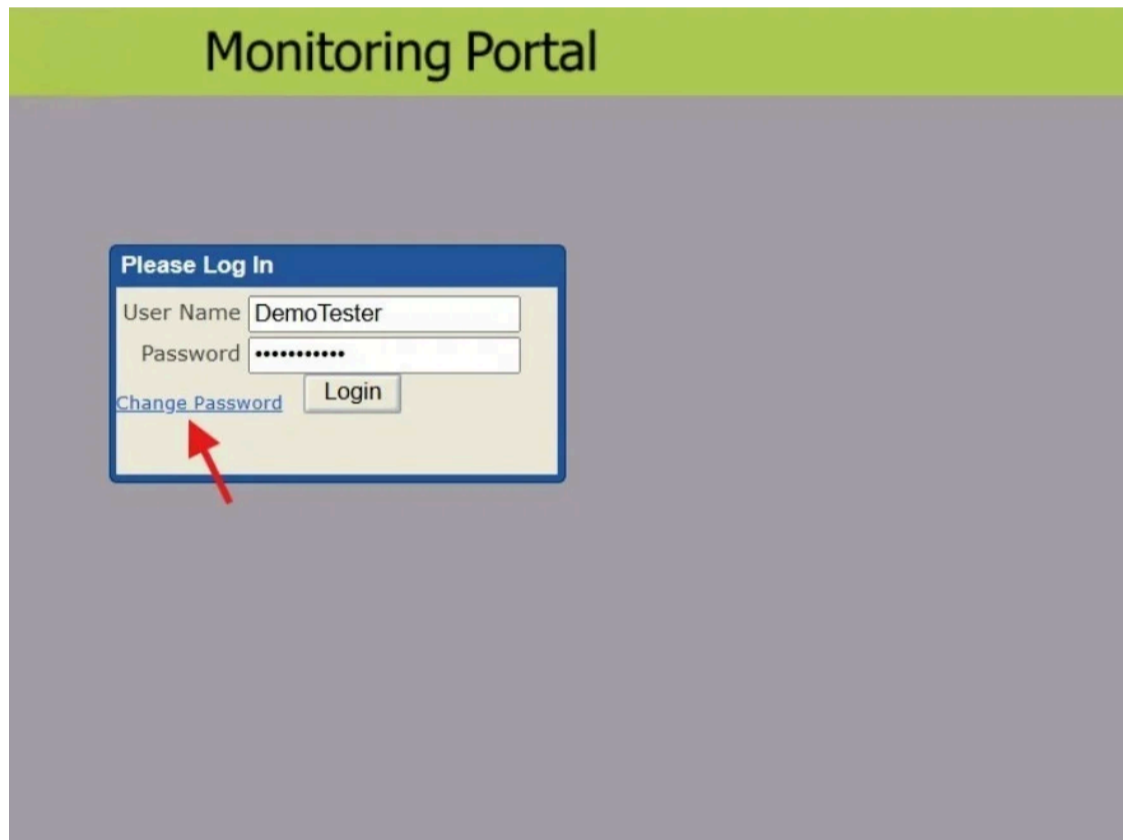

Beginning next week, you will receive an email containing the usernames associated with your dealer site group. In some cases, usernames may have been modified to meet system requirements. Any changes will be reflected in the email.

The email will also include a unique temporary password for each user. We strongly recommend that users change their temporary password to a secure, confidential password upon their first login to the dealer portal.

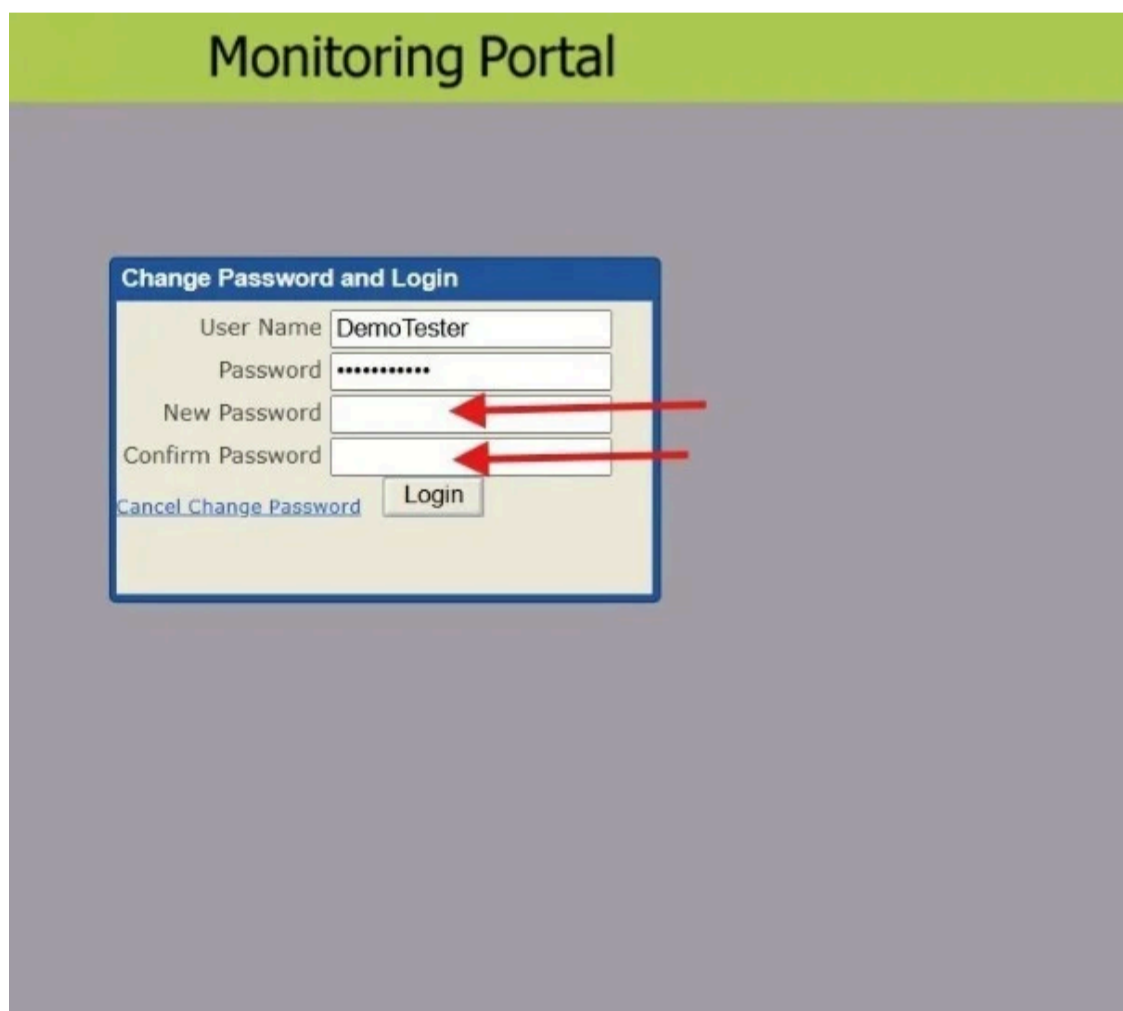

You can expect to receive the credential email between June 9 and June 10. Please note that these credentials will not become active in the Becklar Stages software until the go-live date of June 16. Once received, next week, please review the list of users associated with your site group and share the appropriate credential information with them as needed to ensure they can access the dealer portal.

[Click here to be redirected to the Becklar dealer stages portal where passwords may be reset.](#)

Upon go-live, please follow the steps below to reset your password and login to the Dealer Portal

Enter your temporary email obtain in the email and then create your new password. Your password must be 12 characters long and we recommend using a combination of upper case, lower case, numbers, or special characters

To view past webinar trainings or if you have missed any of our previous emails, you may find them [HERE](#).

We look forward to serving you.
